

Microcurrent Facial & Body Sculpting
No Pain - No Redness - No Downtime
Visible Results After First Treatment!

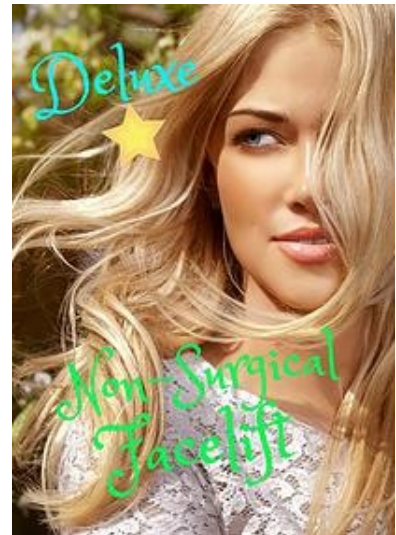

★ *BeautifulImageCo.com*

Microcurrent facial & body sculpting procedures are becoming the hottest cosmetic procedure in the United States. With their growing popularity, these treatments are becoming the treatment of choice for anyone desiring to combat and even turn back the signs of aging.

As Featured On

Hollywood celebrities are already publicly admitting to being fans of this technology, including stars like Sandra Bullock, Drew Barrymore, Jennifer Aniston, Kelly Ripa, Gwyneth Paltrow, Meryl Streep, Rene Zellweger, Goldie Hawn, Jamie-Lee Curtis, Mel Gibson, Liv Tyler, Kate Winslett, Michelle Pfeiffer, Susan Sarandon, Jane Fonda, Cliff Richard, and many more.

Microcurrent treatments emit subtle electrical frequencies that mimic the body's own electrical signals sending familiar messages to the muscles and the cells in the skin. This natural cosmetic procedure does not rely on wounding the dermis to stimulate anti-aging properties.

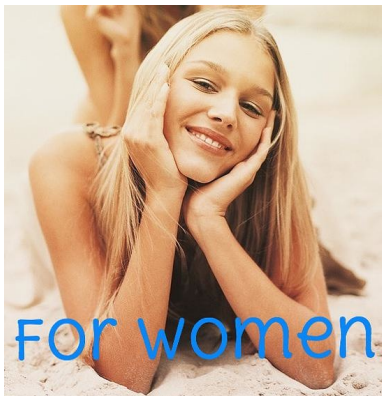

The number of procedures depends upon the state of your skin and facial aesthetics. Everyone requires at least 10 series weekly protocol before going into a monthly maintenance program. During your first session we will be able to determine your most effective approach. This is based on age, texture of the skin and underlying muscle tone. You'll be required to receive two (2) treatments a week for the first one or two weeks, and then, you may transition into weekly treatments for the remainder of your 10 series protocol. Following the initial

course of 10-12 WEEKLY (at first bi-weekly) treatments, once a month "Monthly Maintenance / Booster Treatments" keep your great, new, natural good looks vibrant, uplifted & polished.

Some of the Many Facial Sculpting Benefits

- Reduction of fine lines, creases, & wrinkles
- Hydration & revitalization, resulting in smoother & softer skin
- Improvement of blood circulation & lymphatic drainage
- Rejuvenating restoration of the "pink glow" of youthful tones
- Visible firming & contouring, lifting overall drooping features
- Tightening of sagging jowls, doubling chins, & fatty cheeks
- Shrinking of enlarged pores
- Reduction of blackheads & acne
- Reduction of scars & pitting
- Reduction of dark circles & puffiness under eyes
- Reduction of the symptoms from eczema, melasma, & rosacea

Some of the Many Body Sculpting Benefits

- Firm & lift buttocks
- Toner stomach & legs
- Sleeker arms
- Spot treatment in specific body areas
- Tightening of loose or wrinkled skin
- Cellulite reduction
- Body shaping & muscle toning
- Boosts metabolism & energy levels
- Reduces scars, acne, & stretch marks
- Improved muscle strength

- Treatment of post-pregnancy body issues
- Reduction in calloused elbows & knees
- Measurable overall reductions

Beautiful Image Facial & Body Sculpting Treatments

Look at this as exercise for your face & body. Microcurrent actually stimulates the muscles to firm them. This is much like you going to the gym and stimulating your arm muscles by lifting weights, firming and toning them.

*Once You've Successfully Scheduled Your Appointment Online
(Click Here to Schedule)*

1. Please **click here** to visit our website & follow along with the “**Before Your First Appointment**” Steps.
2. Be certain to **click here** to **complete the Online Intake Forms** before you arrive at your first appointment, for we can't “rest our wands on you” until you DO.
3. If your appointment is for a full treatment, you will be with us for anywhere from 60 - 90 minutes - as determined by the type of treatment you selected. (*If your appointment is for a FREE Demonstration, please know that you will be with us for about 30 minutes.*)
4. Please consult your Appointment Confirmation Email - to check on your appointment time, date & tenure. Be sure to make a note of your session time & day in your calendar. While you may well receive a text reminder from us, 24-48 hours before your treatment, still, it's a great idea to set up a backup reminder for yourself.
5. You may wish to review our **Reschedules & Cancellations Policy** here, as well.

Some Essential Items to Know & Act Upon,

As You Prepare For Your Session

1. (If you've scheduled a facial treatment with us)... Some techniques of the procedure will involve points along the neck and upper chest area around the collarbone, so you may be asked to wear a salon wrap. You may elect instead to bring a spaghetti strap garment to allow access to this area. It is not necessary for women to remove their bra.
2. Your makeup will be removed in the initial phase of the facial procedure, so you may choose to wear little or none at all before your appointment. You may reapply makeup afterwards. **Note:** Eye makeup is not always removed by this procedure, especially mascara.
3. Although not necessary, it is recommended that you remove your contacts prior to a procedure session.
4. Although **Beautiful Image Facial & Body Sculpting™** has shown fantastic results on skin disorders such as acne, we cannot perform this procedure while you have any open sores or wounds.

Before You Arrive At Your Appointment

1. It's advisable to arrive to our office 10-15 minutes in advance of your first treatment, in case there's any outstanding item of paperwork we may require.
2. Please be sure to drink at least 16 ounces of (*preferably filtered*) water within two hours of your appointment, as this will help to hydrate your body / skin & provide a better conduction with the microcurrent. It is also important to drink 8 ounces after your treatment, as well.
3. It is recommended that the Skin Support Cream used during your procedure is not washed off after your treatment. The Skin Support Cream will be massaged into your skin & any excess is gently patted off your face, allowing you to either leave as is, or you may apply makeup. Ideally the Skin Support Cream should not be washed off for 4-6 hours (& *no sooner than 2 hours*) after your treatment. If possible, sleep with the Skin Support Cream still on your face, as

you will notice a fantastic improvement in the quality of your skin when you awaken.

What to Expect During & After Your Treatment

After an initial cleansing & toning of your face, there will be Three Phases of Beautiful Image Facial Sculpting performed.

1. Phase 1 will stimulate circulation
2. Phase 2 is the sculpting phase
3. Phase 3 is the setting phase

You should not feel any pain. Some people may feel a “tingling” sensation. This is normal. If the tingling becomes uncomfortable it is simply because more Skin Support Cream may need to be applied to that area. Simply inform your professional and she will take the appropriate measures. We intend for your treatment to be relaxing and comfortable for you at all times.

Everyone experiences different results after a treatment. There is no way to tell what aging effects will be improved the most. However, **you can count on seeing and feeling a difference after the very first treatment.** Typically, clients over the age of 40 see the greatest youthful changes, although younger clients benefit by postponing the signs of aging & maintaining their current youthfulness.

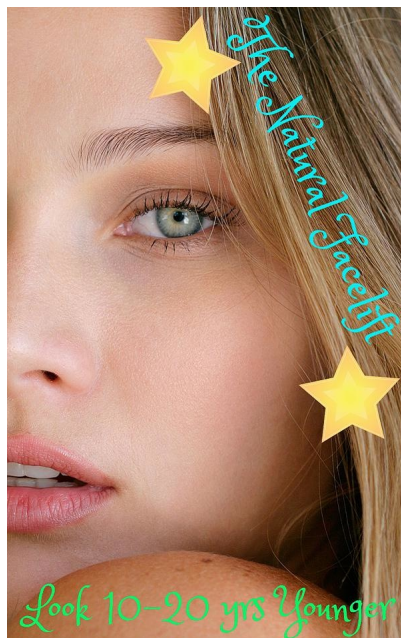

Some Potential Results from Your First Treatment May Include

- Positive changes in the overall glow/color of your skin.
- An overall lift of the facial contours & certain features (*many notice the eyes & jowls*).
- Skin feels tighter & less affected by gravity & movement.
- Some minor smoothing of lines/wrinkles is also common.
- Skin disorders, especially acne & Rosacea may reduce right away.
- A very relaxing experience.

Some clients appear more changed than others upon their first session, but all experience age defying changes as muscle memory begins to increase at the 6th or 7th session. The quality of your diet, frequency of exercise & amount of clean water you drink will influence the speed & impact of your results, as well as being a non-smoker.

(If you'd like some pointers in the latter "healthy living" department, *JUST ASK ! --->*
Coming Soon ~ Holistic Health Coaching & Counseling.)

Again... Please be sure to drink at least 16 ounces of water (~ *filtered & purified*)
within two hours of your appointment, as this will help
to hydrate your body / skin & provide a better
conduction with the microcurrent. It is also important
to drink 8 ounces after your treatment, as well.

After your treatment is complete, you may resume your
normal day without any swelling or inflammation.

And be reminded: We highly recommended that the
Skin Support Cream used during your procedure not be
washed off after your treatment. The Skin Support
Cream will be massaged into your skin & any excess is
gently patted off your face, allowing you to either
leave as is, or you may apply makeup. Ideally the Skin
Support Cream should not be washed off for 4-6 hours
(*& no sooner than 2 hours*) after your treatment. If
possible, sleep with the Skin Support Cream still on
your face, as you will notice a fantastic improvement in

the quality of your skin when you awaken.

That's all there is to it !

Confident in the age-defying results you can achieve, we look forward to your coming
visit.

Be well !

Warmly, with all the best...
